

# The Simple Contact Tracing Solution

BRING YOUR OWN DATA

Guest Protect™ Powered by BYOD™

## Background

- Guest Protect™ was created to help restaurants follow CDC, state and local guidelines to effectively contact trace in response to COVID-19.

## Solution

- Guest Protect™ is a platform that collects individuals' information upon entry to a business and attaches this to a venue's QR location code.
- All data is encrypted. Time and date stamps are stored in a secure AWS cloud environment until required for official purposes.

The screenshot shows a mobile application interface for 'GUEST PROTECT'. At the top left is the 'GUEST PROTECT' logo, and at the top right is the 'MICHIGAN RESTAURANT ASSOCIATION' logo with the text 'Endorsed By:'. Below the logos is a purple header bar with the text 'Wild Wolf solutions'. The main form contains several input fields: 'First name', 'Last name', 'Phone', 'Email', and 'Number of minors'. The 'Number of minors' field has a dropdown menu with '0' selected. At the bottom of the form is a blue 'Submit' button. Below the form, there is a disclaimer: 'All restaurants are required by DHHS Executive Order 29 to collect this data and have it available for the local health department for 14 days.'

## Key Benefits

- Entry to venues is quick and touchless.
- Personal data is encrypted and always protected.
- The space you enter has up-to-the-minute contact tracing.
- Restaurant menus and promotions are integrated into Guest Protect's™ QR code.

## Ease of Implementation

- The solution can be operational in less than 30 minutes.
- User support is provided via a call center.
- As screening requirements change, re-configuration can occur in minutes.
- Each venue has configuration and user control via admin capability.
- A detailed user guide will be provided to the administrator. Remote training is available.

## Value Proposition

- Guest Protect™ meets all CDC guidelines and state and local directives.
- Low administrative and operational overhead.
- Secure and protected personal data.
- Guest Protect™ is a green and paperless solution.
