Home Laundering

Activation and Care Instructions

BioSmart™ is a patented Milliken™ technology that binds chlorine to the fabric surface in the wash cycle.

NOTE: BioSmart garments must be laundered with an EPA-registered chlorine bleach to charge the fabric with chlorine initially, and to recharge during each wash.

The initial charge procedure and the recharge procedure for BioSmart are the same. In each case, EPA-registered chlorine bleach should be used.

WASHING

1. Masks made with BioSmart material should be sorted and washed separately from other garments. Only wash with items needing EPA-registered chlorine-bleach. **Most of them indicate that the proper concentration is 1/2 cup per standard home washing machine load.**
2. Use a regular laundry cycle and be sure to include the rinse step. Failure to rinse may cause spots of higher amounts of chlorine-bleach causing irritation.
3. Use proper levels of EPA-registered chlorine-bleach, as listed on their Care Label Instructions.
4. The fabric can be dried in any manner (tumble dry, line dry, etc.) without affecting performance.

Pricing will vary on type of mask that is purchased and quantity.

SOAPS AND SANITIZER

Alco-Foam Hand Sanitizer
evaporates quickly. It kills 99.99% of common germs that cause illness, leaving hands smooth and refreshed. Light citrus scent. Active ingredient: 60% ethyl alcohol.

FoamFresh Antimicrobial Hand Wash
is a high quality foam soap formulated with moisturizers and conditioners. It is ideal for use where bacteria reduction is a concern. It has a pleasant cucumber-melon fragrance and is formulated with collagen to moisturize the skin as you wash. Active ingredient: 0.25% PCMX.

FoamFresh Luxury Foam Hand Wash
is a general purpose foaming hand wash enriched with humectants, emulsifiers and moisturizers to gently wash away impurities without drying your skin. It has a fresh, floral fragrance. **Green Seal Certified.**
